Stair Nosings

Denby Way, Hellaby Industrial Estate, Rotherham, S66 8HR
Reg. No. 1343514 Reg. Office: Slacks Farm, Bramley Rotherham, S66 1TZ

Our Stair Nosings Options

Stair Nosings:

Stair Nosings provide a protective strip to the edge of your seating unit's stairs and steps, reducing wear to carpets and making them safer. They also give extra grip to footwear, reducing the risk of slipping and tripping when traversing up and down steps.

Our standard stair nosing on carpeted units is "Mist" (light grey in colour) on the edge of the stairs and "Yellow" on the rise in elevations. Other colour options are available on request with restrictions on colours available dependant on the carpet colour chosen to meet LRV standards).

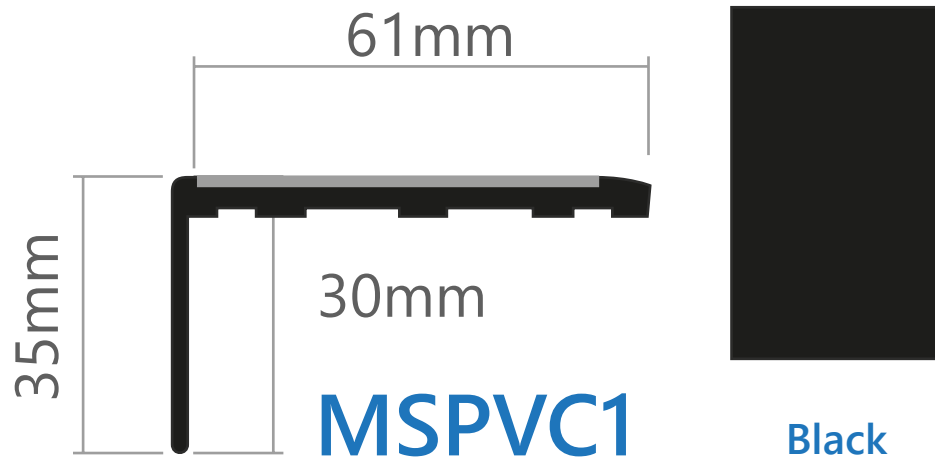

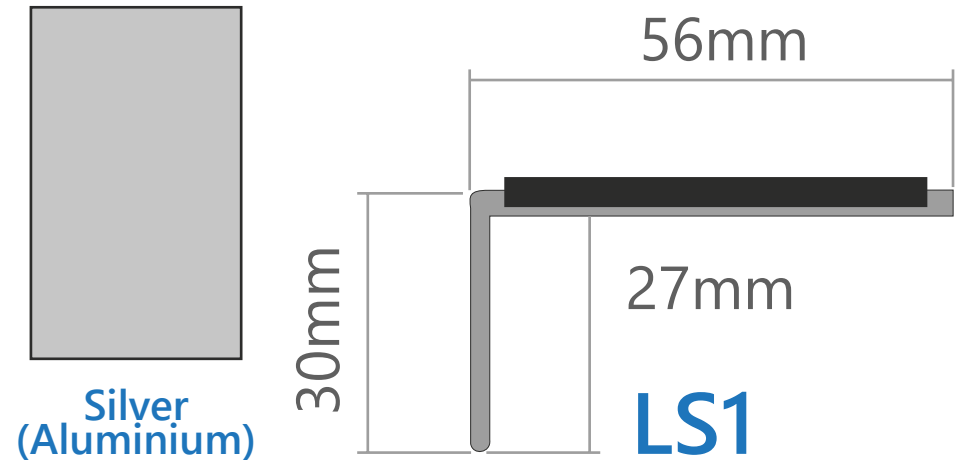

Marlings Stair Nosings

Retractable Units - Stair Nosings

We fit stair nosings on all edges of the decks and step on all our retractable units. This gives your seating unit a greater level of safety by adding better foot grip on the edges of steps and giving visual aid to increases in elevation.

This also extends the life of the carpet on your unit by protecting the edge of the treads from getting damaged or worn down over time.

For retractable units, we use a square-edged aluminium tread fixed on the ends at the end of all steps and is accompanied by aluminium edging.

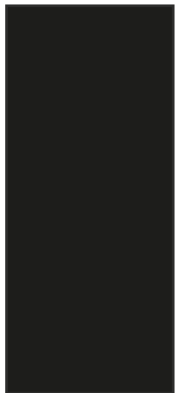

Fixed Tiering Units - Stair Nosings

We fit stair nosings on all edges of the decks and step on all our fixed tiering units. Giving your unit a greater level of safety by adding better foot grip on the edges of steps and giving visual aid to increases in elevation.

This also extends the life of the carpet or the wood finish on your unit by protecting the edge of treads from getting damaged or worn down over time.

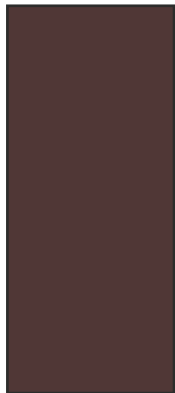

For fixed tiering units, we use a square-edged PVC tread fixed on the ends at the end of all steps and is accompanied by PVC edging. (black as standard).
