Retractable Unit Operation Types

Introduction

About Auditoria Services Ltd.

Auditoria Services Ltd. have been designing, manufacturing and installing spectator seating from Rotherham, South Yorkshire, since 1977. Still family owned and now in its second generation, we are committed to investing in our workforce, producing everything in house, sourcing materials locally and placing importance on quality and customer satisfaction. Our team are here to support you through every stage of your project.

DESIGN

With nearly 50 years' experience in the industry and thousands of successful projects to draw from we have a depth of knowledge that is the envy of our industry. We create bespoke seating solutions with the latest CAD technology, providing customers with 2D and 3D visuals of their seating. Our customisable tried and tested ranges offer reliability, safe operation, long lifetime expectancy and low operational costs.

MANUFACTURE

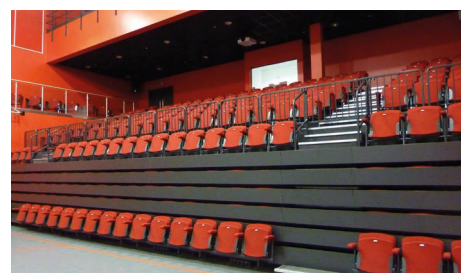

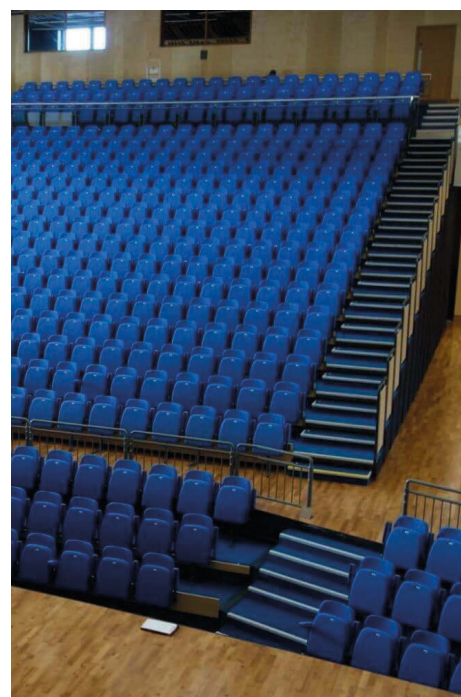

We continually invest in the latest technology; constantly improving our designs and processes. Sourcing over 70% of raw materials locally and manufacturing everything under one roof gives us complete control, from initial concept and design, to installation and handover.

INSTALL

We pride ourselves in some of the best installers in the UK who place the utmost importance in customer satisfaction and quality. We take the safety of our workforce and those working around them seriously and are proud to have won awards and recommendations for our approach to Health and Safety.

SERVICING

Whilst our seating is designed to require minimal maintenance, our dedicated service team are always on hand for parts, servicing or to answer questions about any of our cinema, retractable, lecture theatre or theatre seating installs.

Unit Operation Types

About Our Retractable Unit Operation Types

We offer a variety of unit operation types to effectively meet your needs and suit your venue.

Choosing the right operation type for your unit can enhance the versatility of your space and help manage loadings for various sports or performance floors.

Unit Operation Types

Retractable Units

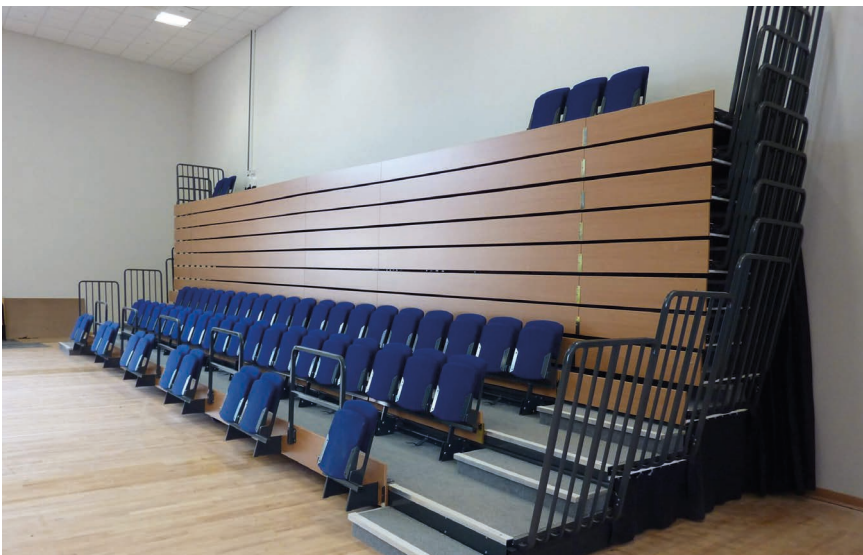

STANDARD CLOSE UNIT

Our standard close units retract from tier 1 backwards, with each consecutive tier sliding beneath the one above it and continuing until all tiers are stored flush together, forming a single vertical unit.

REVERSE CLOSE UNIT

Our reverse close units retract from the last tier forwards with each consecutive tier sliding beneath the one above it and continuing until all tiers are stored flush together, forming a single vertical unit. This design helps distribute the load on the floor as the unit closes before reaching its final stored position.

PARTIALLY OPEN UNIT

Our partially open reverse close units retract from the last tier forwards with each consecutive tier sliding beneath the one above it. This configuration provides the flexibility to leave some rows open, allowing you to utilise only the required number of positions for reduced-capacity events.
